Profile

I am an enthusiastic and experienced first year software engineer, studying at Aberystwyth University. I am on track for a good first level degree with skills in web development and content management, along with a good understanding of both Windows and Unix systems from a web perspective. I have experience in the creation of web pages and applications along with the relevant graphics. Now I am seeking to expand my web development knowledge and skills in a practical and real world situation.

Key Achievements and Skills

- I am good at working within a team.

- I am careful to make sure my work contains all the needed details.

- I have created a website, including WordPress and OScommerce, on a Unix system as part of my Web Development module (can be seen at: `http://users.aber.ac.uk/opt1/cs15020/`).

- I have experience with:

- HTML, XML, JavaScript and Perl

  - *HTML 4.01 in A-Level computing*
  - *HTML 5, XML and JavaScript in Web Development Module*
  - *Perl at Aberystwyth Summer University*
  - *JavaScript and Perl are also frequently used in my free time*

- Windows and Unix

  - *I use both Windows 7 and 8 daily*
  - *Also have experience with Vista and XP*
  - *Regularly use Raspian (Debian) on Raspberry Pi, also used Mint and Ubuntu*
  - *All from a developer's viewpoint*

- DreamWeaver

  - *Used extensively for GCSE ICT*

- Photoshop

  - *Used in free time along with GIMP*

Education

2013 - Onwards: Aberystwyth University - Software Engineering (Including Industrial year)

Outcome: Masters in Engineering.

Content: Introduction to Programming, Hardware, Unix, Web Development and Communications.

Future: Advanced Programming, Web Administration and Applications, AI and Robotics4

2011 - 2013: Ysgol Dyfryn Taf - Sixth Form

Outcome: B - Computing, D - Physics.

Content: Studied HTML and networking technologies.

2006 - 2011: Ysgol Dyfryn Taf - GCSE's

Outcome: A*, 2 As, B, 5 Cs

Content: Learned DreamWeaver in ICT

Employment

None yet, but I am keen to get some experience!

Interests

I am very interested in the way the web is evolving and I want to be a part of that. I like developing applications that work across multiple platforms, such as websites for both mobile and desktop clients. I also have interests in hardware development and I would be very interested in learning how the servers and backend systems function.
